### **Details:**

Poseidon Ocean Systems designs and manufactures advanced, reliable solutions for the marine and oceanographic industries. Our work supports critical operations in challenging environments, and we pride ourselves on quality, safety, and teamwork. Position Overview Reporting to the Production Manager, the Production Technician is responsible for assembling high quality equipment and systems in accordance with engineering drawings, work orders, and production plans. This is a hands-on role within a manufacturing and warehouse environment, suited to a self motivated individual with a strong work ethic, excellent attention to detail, and a collaborative mindset. The successful candidate will use their technical skills, experience, and judgment to ensure products are assembled, tested, and commissioned safely, accurately, and on schedule. Key Responsibilities • Assemble products and systems according to drawings and specifications using hand and power tools. • Work with piping systems, including assembling and welding threaded and grooved pipe, as well as HDPE pipe welding. • Operate in and around engines and mechanical systems in a safe and controlled manner. • Perform quality checks, testing, and commissioning of finished products. • Operate shop equipment, including overhead cranes and forklifts. • Complete general manufacturing and shop duties such as material handling, housekeeping, and tool and machinery operation. • Collaborate with production team members to meet schedules and project deadlines. • Maintain organization, cleanliness, and security of stock rooms and work areas. • Participate in periodic inventory counts to ensure accurate stock levels. • Carry out other related duties as assigned. What We Offer • Company paid benefits program. • Company RRSP matching. • Three (3) weeks

of paid vacation per year. • Opportunities to develop skills and grow within a dynamic and innovative organization. We thank all applicants for their interest; however, only those selected for an interview will be contacted.

---

### **Qualifications & Experience:**

Knowledge, Skills & Abilities • Strong attention to detail, organization, and problem solving skills. • Excellent communication and interpersonal skills, with a high level of accountability to teammates. • Ability to adapt to change and ambiguity within a growing organization. • Proactive, safety focused, and collaborative approach to work. Qualifications & Experience • Minimum two (2) years of practical experience working in a manufacturing, mechanical, or assembly setting. • Knowledge and hands-on experience in pipefitting would be considered an asset. • Demonstrated technical and mechanical aptitude with a strong commitment to safety. • Familiarity with mechanical tools and working in and around engines. • Valid BC Driver's License and CSA approved steel toe safety boots are required. • Forklift certification, First Aid, and WHMIS training are assets; training will be provided if required.
