Sunday, June 14, 2026

Details:

Millwright - Port Hardy Processing Plant At Mowi, we are proud to be the world's largest supplier of farm-raised salmon. Our Mowi Canada West operations are located on the coast of beautiful British Columbia and Vancouver Island where we work in partnership with the First Nation communities within whose territories we operate. Our team of over 350 dedicated farmers and processors is committed to producing sustainable farm-raised Atlantic salmon, contributing to food security for our growing global population. Our Port Hardy Processing Plant is the most technologically advanced fresh salmon processing facility in British Columbia. This is a great opportunity to live and work in Port Hardy, a welcoming small-town community located at the northern tip of Vancouver Island. Surrounded by stunning natural beauty, Port Hardy offers easy access to the ocean, forests, and beaches, making it ideal for those who enjoy outdoor activities such as hiking, fishing, kayaking, and wildlife viewing. With a friendly community and endless opportunities to explore the outdoors, it's a great place to work while enjoying the coast and wilderness. We are currently seeking a Millwright to join our team at the Port Hardy Processing Plant. This is a full-time, year-round position, primarily scheduled on day shift; however, other shifts may be required to meet operational requirements. Responsibilities:

- Repair, troubleshoot, and install machinery, including salmon processing, ice-making, ice delivery, and packaging equipment (experience with automated equipment is an asset).
- Read and interpret drawings, blueprints, electrical code specifications, and schematics to effectively troubleshoot, maintain, and repair equipment.
- Optimize equipment performance

safely, efficiently, and reliably by participating in continuous improvement initiatives and completing work orders according to preventative maintenance (PM) schedules. • Perform preventative maintenance and servicing of high-speed packaging and processing equipment. • Support and maintain wastewater systems (experience considered an asset). • Work on other maintenance or improvement projects as required. • Collaborate with other trades and, at times, contractors in a flexible, team-based environment to improve efficiency and productivity. • Assist operations in the safe and efficient operation of processing equipment. What We Offer: • Comprehensive benefits package for eligible employees, including extended health coverage and an annual wellness reimbursement. • Optional participation in the pension plan after two years of service for eligible employees. • Unionized workplace represented by the United Steelworkers, Local 1-1937. Mowi is the world's leading seafood company and the largest producer of Atlantic salmon. As the first global seafood company with an end-to-end supply chain, Mowi brings supreme quality salmon and other seafood products to consumers around the world. Mowi is also ranked the most sustainable animal protein producer in the world by Collier FAIRR. With headquarters in Bergen, Norway, Mowi employs 11,600 people in 26 countries worldwide, and is listed on the Oslo Stock Exchange with a market capitalisation of EUR 9 billion and total assets of EUR 8.2 billion.

Qualifications & Experience:

Qualifications: • Red Seal Certification as an Industrial Mechanic (Millwright) is required (4th-year apprentices may be considered). • Working knowledge of WorkSafe BC and Technical Safety BC regulations, codes, and standards. • Strong troubleshooting and problem-solving skills. • Ability to plan, install, commission, and maintain new equipment. • Proficiency in reading and interpreting electrical schematics, manuals, and mechanical drawings. • Hands-on experience with electrical installation, troubleshooting, and maintenance. • Good working knowledge of current electrical standards and regulations. • Experience with PLCs, pumps, conveyors, hydraulics, and pneumatics. • Ability to read mechanical and piping schematics. • Experience with networking and strong computer skills. • Experience in a manufacturing maintenance environment, preferably within the food industry, is considered an asset.
