Monday, October 19, 2026

Details:

THE OPPORTUNITY Western Forest Products is seeking a GIS Developer Student to join our Corporate Timberlands Office in Campbell River, BC for Summer 2027.

What You'll Do: In this role, you will work closely with the Information Technology (IT) and GIS teams to support the development, configuration, and continuous improvement of enterprise GIS solutions. This role offers an exciting opportunity to gain hands-on experience with ArcGIS Enterprise, web application development, GIS administration, and business process improvement initiatives. The position may be offered as either a 4-month term for students returning to school or an 8-month term for recent graduates, depending on candidate availability and business requirements.

Who You Are: This is a great opportunity for students and recent graduates in GIS, Computer Science, Information Technology, or related disciplines who are looking to gain practical experience with enterprise GIS technologies. We are looking for motivated and dependable individuals who are passionate about technology, problem-solving, and delivering quality solutions. You have a positive attitude, thrive in a collaborative environment, and enjoy learning new technologies.

What We Offer:

- Pay from \$4,600 - \$5,100 per month based on skill level, qualifications, and experience
- 4% Vacation pay in lieu
- Living Out Allowance and Relocation Assistance

Work Environment: This position is to be performed in person at our Campbell River office.

RESPONSIBILITIES

- Assist

with the administration, configuration, optimization, and support of an ArcGIS Enterprise environment. • Create and support image and map services through performance monitoring, tuning, and usage analysis. • Assist in the development and enhancement of GIS applications using ArcGIS Enterprise technologies. • Create and maintain web maps, feature services, dashboards, and other GIS resources. • Participate in testing, troubleshooting, and quality assurance activities for GIS solutions. • Prepare technical documentation, standard operating procedures, and user support materials. • Collaborate with IT and GIS teams to identify opportunities and implement improvements to enterprise GIS systems and business processes.

YOUR CAREER At Western Forest Products, we believe our most significant asset is our people. Investing in our people brings value and success to our business, ensuring a safe, engaged, productive and continuously improving workplace. We offer challenging opportunities working alongside the best in the industry to meet your career and professional development goals while providing competitive total rewards and recognition. We provide a variety of on-the-job training and continuing education in many areas at Western to ensure you have the skills you need to succeed. Our promote-from-within culture recognizes high performance and we offer diverse career paths across the organization for those with the talent and will to advance.

WESTERN OVERVIEW Western Forest Products is a leading forest products company that sustainably manages forests and manufactures high-quality wood products. Headquartered in Vancouver, British Columbia with operations in the coastal region of BC and Washington State, Western meets the needs of customers worldwide with a specialty wood products focus and diverse product offering. Our commitment to health and safety, environmental stewardship and community engagement is core to how we do business at Western Forest Products. Our approach to responsible business practices in all aspects of our business is multi-faceted. We adhere to and employ the most stringent environmental practices in the world. The steps we take to ensure the forests in which we operate are renewed and remain healthy and viable for future generations are mirrored in the care we take to make certain our communities continue to grow and prosper. This includes investing in communities where we operate and continuing to forge mutually beneficial relationships with First Nations in respect of their local and cultural interests.

Qualifications & Experience:

Education and Experience • Currently enrolled in or recently graduated from a post-secondary program in GIS, Computer Science, Information Technology, or a related discipline. • Previous GIS, software development, or co-op work term experience is considered an asset but is not required. Skills, Knowledge and Required Competencies • Familiarity with ESRI products such as ArcGIS Pro, ArcGIS Online, or ArcGIS Enterprise. • Experience through coursework, projects, or work terms creating web maps, dashboards, or GIS applications. • Basic understanding of GIS application development concepts and enterprise GIS environments. • Familiarity with relational database concepts; experience with Oracle or other relational databases is an asset. • Familiarity with Python, JavaScript, SQL, or other programming languages through coursework or projects is considered an asset. • Strong analytical, problem-solving, and organizational skills. • Strong written and verbal communication skills. • Positive attitude and ability to thrive in a collaborative team environment.
