Aluminum Welder/Fabricator-Marine Refit, Repair & New Vessel Construction | Campbell River, BC Ocean Pacific Marine is growing, and we are looking for experienced Aluminum Welder/Fabricators with experience in marine refit/boatbuilding to join our team in Campbell River, BC. Operating since 1985, Ocean Pacific Marine is one of Northern Vancouver Island's most comprehensive marine facilities. Our full-service boatyard supports a diverse range of commercial, government and recreational vessels, with projects ranging from vessel repairs and major refits to modifications and new vessel construction. Our customers include local commercial operators and recreational boaters as well as the Government of Canada, Department of National Defense, Canadian Coast Guard and RCMP. As our workload continues to grow across both refit/repair and new-build projects, we are expanding our welding and fabrication team. The Position This is a full-time, year-round, Monday-to-Friday position working from our Campbell River boatyard. As an Aluminum Welder/Fabricator, you will work on a wide variety of marine projects, including:

- Aluminum vessel construction and structural fabrication
- Major vessel refits and modifications
- Hull, deck and superstructure repairs
- Structural alterations and upgrades
- Fabrication and installation of marine components
- Fitting, welding and finishing aluminum assemblies
- Reading and working from drawings, specifications and fabrication details
- Working alongside our mechanical, electrical and marine systems teams to complete complex vessel projects
- Projects and challenges change regularly, providing the opportunity to apply your trade across new construction, refit and repair work.

Ocean Pacific Marine offers:

- Competitive hourly wages based on experience and qualifications
- Full-time, year-round employment
- Monday-to-Friday schedule
- Extended medical and dental benefits
- Tool allowance
- Diverse and challenging marine projects
- Opportunities to work on both new vessel construction and major refit/repair programs
- A long-established Campbell River employer with more than 40 years in the marine industry

If you are an experienced

aluminum welder/fabricator looking for an opportunity to work on challenging marine projects and be part of a growing Vancouver Island shipyard, we would like to hear from you. Benefits: •Dental care •Employee assistance program •Extended health care •Life insurance •Vision care

Qualifications & Experience:

We are particularly interested in candidates with: •Strong aluminum welding and fabrication experience •Experience in marine, shipbuilding, boatbuilding or heavy fabrication environments •Ability to fit and fabricate from drawings •Strong MIG welding skills with aluminum •Red Seal Welder and/or Fabricator certification preferred •Current CWB 47.2 welding qualifications considered an asset •Strong attention to quality and workmanship •Ability to work effectively as part of a multidisciplinary trades team •While trade certification is preferred, experienced aluminum fabricators without formal certification are encouraged to apply. Demonstrated skill and relevant experience will be considered.
